The Benefits of
Having an EAP

Employee Assistance Programme

What is Counselling?

Counselling is a talking therapy where you are given undivided attention in a safe and confidential environment. The therapist will actively listen and facilitate exploration.

What is EAP?

Your EAP is a service that provides employees and dependent family members assistance in resolving a broad range of personal concerns that can negatively impact personal well-being or job performance.

What Can Counselling Help With?

Counselling can help you cope with:

- A mental health condition, such as ***depression***, ***anxiety*** or an ***eating disorder***
- An upsetting physical health condition.
- A difficult life event, such as a ***bereavement***, a relationship breakdown or work-related stress
- Difficult emotions – for example, low self-esteem or anger

Other issues, such as:

- Sexual identity
- Parenting questions
- Family relationships
- Dealing with anger
- Grief & loss
- Balancing work and life
- Stress management

What To Expect From Your Counselling Session

At your appointment, you'll be encouraged to talk about your feelings and emotions with a trained therapist, who will listen and support you without judgment or criticism.

The therapist can help you gain a better understanding of your feelings and thought process, to help you find your own solutions to problems. They won't usually give advice or tell you what to do.

It can take a number of sessions before you start to see progress, but you should gradually start to feel better with the help and support of your therapist.
